SHOP EQUIPMENT  
SERVICE MAINTENANCE

**AFFORDABLE • EASY INSTALLATION • NO PIPING • 360° ROTATION**

PERMANENT EPA  
REGULATION EXEMPT

ML  
Series

MLM Lifts and Manufacturing, LLC is a leading producer of high capacity, low pressure single-acting cylinders for various industries. Effectively a combination of Globe Lift and the former Gilbarco lift division, MLM has an extensive engineering data bank that extends back to 1928. This broad knowledge base and an ever present can-do attitude has driven MLM into many markets as a mainstay supplier of products to increase shop and in the field productivity.

SESM lifts from MLM are a perfect solution for those engaged in the sale, service and use of equipment associated with outdoor activities. Our style of lifts can be found in golf cart dealerships, landscape equipment maintenance shops, ATV dealers, motorcycle shops and just about anywhere else someone wants to make their job more productive and easier to accomplish.

MLM is a family-owned business and a subsidiary of SVI International, Inc. Great pride is taken in the job we do, as MLM is an America-First enterprise. We support American jobs, American craftsmanship, American engineering and all the American companies we can proudly call our customers. Please put an SESM lift to work for you in your shop today. Become a fan of MLM and add to our growing list of wonderful testimonials from satisfied customers. You will not be disappointed.

All MLM Lifts are Made in  
DeKalb, Illinois USA

outperform competitors and your expectations.  
own the coolest piece of equipment in your shop.

**EASY INSTALLATION  
OF SESM LIFTS —  
Installs in 3 Hours or Less!!**

Simply saw through concrete.  
Auger hole for cylinder.

Place cylinder in hole.

Drill holes, anchor  
down, and add fluid.

Install Lifting Structure and take  
full advantage of your cool  
time-saving tool.

**~ DOES NOT REQUIRE ELECTRICITY  
OR HYDRAULIC PUMP ~**

**HOW THE LIFT WORKS**

This semi-hydraulic air/oil lift may be the easiest lift to operate in the world. Simply connect a flexible shop air line to the supplied valve control line and depress the valve introducing air to raise the lift. Once raised to the desired height, release the valve, disconnect your air line and the valve control line if you wish. The lift will stay up in place. When it is time to lower the lift, reconnect the valve control line (if you removed it), and depress the valve. The air will slowly discharge through the valve and the lift will return back to the floor. Or, release the valve at any point during descent and the lift will promptly stop going down for your next work level. *It's that easy!*

Valve  
Control Line  
(Standard)

**benefits** Install Anywhere

- Work at your height, not the floor height
- Tie down slots included in the platform to prevent tip overs during rigorous service activities
- Full access for front and rear wheel service and removal
- Helps recruit and retain the best shop technicians
- Operates off shop-air compressor / Self-contained unit, no under floor piping, no external air/oil tank
- Capacities from 1,000 lbs. to 25,000+ lbs. For larger capacities, ask about our LESMs.
- Fiberglass Encapsulated Casing Protects from Corrosion
- Various Stroke Lengths and Cylinder Sizes
- Compatible with all Hydraulic Fluids including Coast Guard and US Forestry Service Approved Environmentally Safe Fluids
- Design that lasts more than a lifetime
- Easy-to-service, only 1 moving part!
- Greatly improves shop productivity
- Ideal for rental properties—this lift is easily removed for relocation. Simply unbolt from the floor and remove. Add some backfill to existing hole and patch the concrete like it was never there. Reinstall lift in your new location.
- Must-have for busy shops
- 360° rotation keeps you between the work and the workbench
- No obstruction when lowered—park right over it.
- Superior operation and safety compared to imported above-ground scissor lifts
- Get the real deal for All-American shops — Welded together by Americans for Americans!
- **The best purchase a shop owner/operator can make!**

**options**

- TDC chrome-plated plungers — *Make it last forever!*
- Various style of wheel chocks made of steel or rubber
- Rubber Stack Pads (1-1/2" or 3" Tall)
- Safety Leg / Non-Rotator
- Safety Leg / Rotator to allow full 360° rotation of the platform

TDC Chrome-Plated  
Plungers

Safety Leg  
Non-Rotator

**MLM knows custom.** This is just a small sampling of various sizes and options we offer. If you don't see the dimensions or specifications you're looking for, no problem! Let us know and we'll work with you to make the lift to meet your needs!
